Experience in : **C** **JAVA** **C++** **PHP** **GOOGLE ASISTANCE** **WHATS APPCHATBOT**  
**FIREBASE** **PYTHON** **UNITY** **My SQL** **DIALOG FLOW** **ONE SIGNAL** **AUTOMATION**

## Work Experience

- **Groc for me** [Source Code [↗](#)]  
Developed an E-commerce website in java through which customers can order groceries and get them at their doorstep through delivery boy as a software project. App also has a customer care chatbot that is based on Machine Learning Modle.
- **QR code Scanner & Generator** [Source Code [↗](#)]  
App: **Google Playstore & Samsung Store**  
Through this app, people can scan any QR Code and can also generate any QR code of their choice, and can also share it with friends.  
**5-star rating** in Google PlayStore
- **Meme Application** [Source Code [↗](#)]  
It is an android that works on API. It fetches the memes from the API and displays it in the app. People can move to the next meme and can also share the meme to their friends on socialmedia and messaging applications. The app is available in **Google PlayStore**.
- **Augmented Reality App** [Source Code [↗](#)]  
Developed an Augmented Reality App with the help of **Unity Software** where a video is triggered with the help of an image.
- **Zeep Service** [Source Code [↗](#)]  
An application which helps customers to commute from home to college campus and visa versa and brings customer and drivers at one single platform to manage the passengers by their respective drivers. App is published on **Google Play Store** so that thousand of people can get the advantage of the application.
